

YOUTH SUICIDE IN MICHIGAN

THERE IS HOPE

- Suicide IS preventable
- It is a state and national concern
- There is new knowledge everyday
- There are strategies we know work
- THERE IS A ROLE FOR EVERYONE

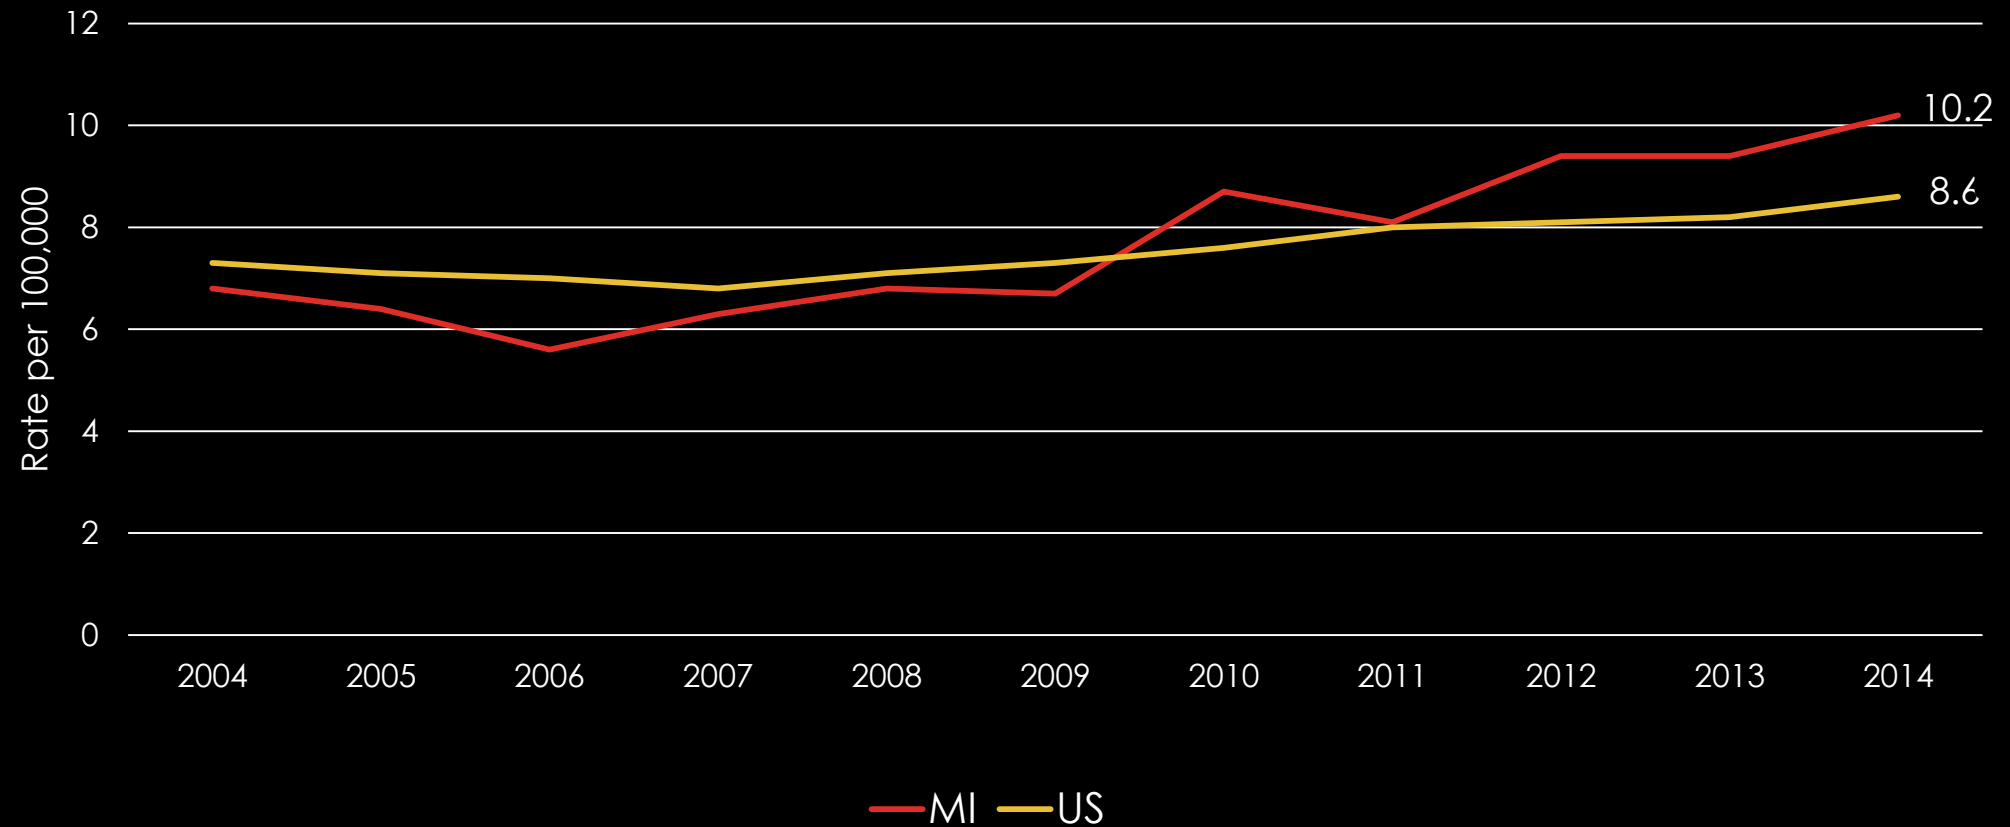

Suicide prevention is not exclusively a mental health issue. It is a *health* issue that must be addressed at many levels by different groups working together in a coordinated and synergistic way.

Federal, state, tribal, and local governments; health care systems, insurers, and clinicians; businesses; educational institutions; community-based organizations; and family members, friends, and others—all have a role to play...

- 
- Suicide is one of *MANY* negative outcomes of *MANY* interrelated risk factors
 - These same risk factors put individuals and communities at risk for *MANY* interrelated negative health outcomes
